

10-SIPH-A Tube Packing Data

10-SIPH-A Packing Configuration: Figure 1.0

Packaging Description:

10-SIPH-A parts are shipped in tube. The tube is made of PVC plastic treated with anti-static agent. These tubes in standard option are placed inside a dissipative plastic bubble sheet, barcode labeled, and placed inside a box made of recyclable corrugated paper. One box contains thirty six tubes maximum (see fig. 1.0). And one or several of these boxes are placed inside a labeled shipping box which comes in different sizes depending on the number of parts shipped. The units in this option are placed inside a small box laid with anti-static bubble sheet. These smaller boxes are individually labeled and placed inside a larger box. These larger boxes then will be placed finally inside a labeled shipping box which still comes in different sizes depending on the number of units shipped.
