

SPM30-AA Package Information

SPM30-AA Tray Packing Configuration: Figure 1.0

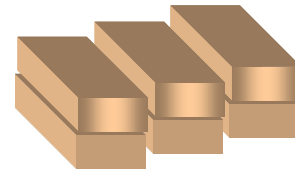

322.5mm x 135.9mm x 15mm
Tray

356mm x 163mm x 96mm
Middle Box

6 Trays per Middle Box
(One of the 6 Trays is a Dummy)
(Maximum Quantity: 40 units per box)

6 Middle Boxes per Large Box
(Maximum quantity: 240 units per Box)

520mm x 380mm x 215mm
Large Box

Packaging Description:

SPM30-AA parts are normally shipped in a tray. The tray is made of recycled HIPS plastic treated with an anti-static agent. One tray contains 8 parts. These trays are placed in a stack with 6 layers, including one dummy layer, inside a middle box made of recycled corrugated paper.

One middle box contains 40 parts. Bubble bags and sponges are inserted in the box to eliminate mechanical shock. Six of these middle boxes are placed inside a labeled large box. The maximum capacity of a large box is 240 pieces. The actual quantity depends on the total number of boxes listed on a purchase order.
